SUPER *Space* FACTS

*DID YOU KNOW?
99% of our solar system is
the sun... its mass is the
equivalent of 1 million earths!*

*Footprints on the moon will stay
there for 100 million years because
they will never erode*

*DID YOU KNOW?
On Venus a year is longer
than a day!*

*DID YOU KNOW?
On October 4th 1957 the
first satellite was launched
to space called Sputnik 1*

*Earth's atmosphere is completely
unique and the only one in our solar
system able to support life!*
