OPAK newsletter from the Masters of

Maths!

Number of the week

competition!

This half term, the Masters of Maths have raised the profile of the Number of the Week in each class. They conducted an assembly to promote the number of the week, to talk about its importance and how children can interact with it, and they launched a Number of the Week poster competition!

The competition was to produce the best poster that talker about the number of the week, explored its properties and raised its profile!

There were lots of entries, and the Masters of Maths chose Aisha as a deserved winner!

World Maths Day!

For World Maths Day, every class took part in an escape room! Each class was "locked" in their classroom, and had one hour to solve maths-based problems to escape!

Each class's maths problems were unique, and were designed to test children's problem solving ability and resilience, as well as their maths knowledge!

Don't worry, we made sure they were let out eventually!

National Numeracy

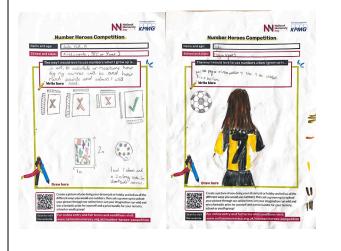

Day 2023!

For National Numeracy Day this year, each class completed a different task. Some children learned how to budget with Mr MoneyJar, some children learned a maths-based dance with "Strictly Come Dancing" star Katya Jones, while others got rapping with Harry Baker! Lots of fun was had throughout the maths lessons, and some really important tips were given for all the children.

There was even a "Number Heroes" competition, for children to create a picture of their dream job or hobby, and to show how number are important to that job. We've had lots of entries so far, and the competition is still open!

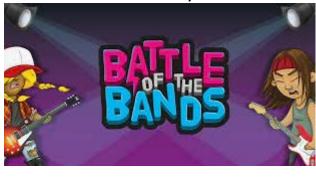

Number Day 2023! Number DUMDET DUV 2023

In order to raise money for the NSPCC, the children were invited to "dress up as digits" – coming to school wearing a number. Lots of children made a huge effort with some amazing outfits, and lots of money was raised through donations!

World Multiplication Tables Day

For World Multiplication Tables Day, the entire school took part in a number of times tables challenges, all led by our Masters of Maths! The main event was a whole school TT Rockstars battle of the bands, which was won by Year 6!
