

Outwood Primary Academy

Hello parents and carers, this half term your child will be learning about...

Y4

Electricity

Leonid Afremov

Circuits

Schools & home

Religious festivals

Happy

Gymnastics

Orienteering

Project Idea

This half term we will be focusing on a variety of different subject areas. These include Electricity in Science lessons, Circuits in D.T and replicating the art of Leonid Afremov in art lessons. For this half-term's homework projects, you could complete any of the following:

Projects –

- A diagram of electrical circuits
- A biography of Leonid Afremov
- A circuitry game – design and/or build your own wire game
- A piece of artwork of similar to Leonid Afremov's style (this could be a painting, sketch, etc.)
- Create a fact-file about all the electrical items in your home
- Write a non-chronological report with different facts about the best place you've visited

These are just a list of suggestions. Feel free to interpret ideas in your own way!

Due 20th May

Follow our class page to find out about the exciting work we're doing this year @OPAK_4LY
