Happy

Creative

Organise

### Project Idea

Our Science focus this half term is **light**, **Renewable Energy** in Geography, **Purses and Wallets** in DT and **Henri Matisse** in Art. You can choose what you want to do for your topic homework and how you want to present it, but here are some suggestions to get you started.

**Maths**- Find out statistics of Renewable Energy impacts around the world.

**English**- Write an instructional text describing how to make a purse.

**Science**- Invent your own light experiment and document your results.

**Art**- Create your own piece of Art inspired by Henri Matisse.

**DT**- Create your own version of a purse using household items / materials.

**Geography**- Create a poster of awareness about Renewable Energy.

**History**- Research the timeline of light, how it started and how it impacts the world.

**MFL**- Research Henri Matisse's art techniques in French.

**Music**- Create a song writing your own lyrics.

**PE**- Create your own contemporary dance routine.

**Computing**- Create a video using different light sources.

**Remember, you can choose what you want to do for your project and you aren't limited to just one idea. We are looking forward to seeing your ideas and what you come up with!**

Your homework needs to be in school by **Wednesday 24th May 2023**.
